

Challenges in Geological Remote Sensing

9th – 11th December 2015

ESA ESRI, Frascati, Italy

FINAL CALL FOR PAPERS

The Geological Remote Sensing Group (GRSG) is pleased to announce the second call for papers for its 26th Annual Conference which will focus on a wide range of remote sensing applications, tools, latest developments and sensors with a particular focus on addressing the challenges faced in the following areas:

- **Mineral Exploration and Mining**
- **Oil & Gas**
- **Big Data and Thematic Exploitation Platforms**
- **Planetary science & comparative geomorphology**
- **Geohazards**
- **Geological applications** (geological mapping, lithological classification, tectonics, seismology)
- **Geomorphology**
- **Terrain, Bathymetry and Elevation models**
- **Classification, multi-temporal analysis and modelling**
- **New sensors:** Sentinel applications, technological developments, analytical methods & algorithms
- **Hyperspectral & Multispectral**
- **Radar / InSAR**

Abstracts (Oral Presentations and Posters): Title, Author(s) and 300 word abstract should be sent to agm@grsg.org.uk

The Geological Remote Sensing Group (GRSG) is a special interest group of The Geological Society (GeoSoc) and the Remote Sensing and Photogrammetry Society (RSPSoc) formed in 1989.

Thank you to our current sponsors and there are still sponsorship opportunities! If you would like more information on sponsorship opportunities then please contact chairman@grsg.org.uk for more details.

Important information:

Conference website: GRSG AGM 2015

Call for papers opens: **15th March 2015**

Registration opens: **15th May 2015**

Call for papers closes: **11th September 2015**
